Industrial Hand Wash Station

Smart Hygiene Solutions for Industrial & Cleanroom Environments

Clean Hands. Safe Workplace. Better Productivity

Presented By: **Sunita Prajapati**

Why Hand Hygiene is Important

Maintaining proper hand hygiene is essential in industries where contamination can affect product quality, employee safety, and regulatory compliance.
Poor hand hygiene may lead to:

- Cross contamination
- Product rejection
- Bacterial and viral spread
- Workplace safety risks
- Regulatory non-compliance

A well-designed **hand wash station** helps maintain hygiene standards while improving operational efficiency.

What is an Industrial Hand Wash Station?

An Industrial Hand Wash Station is a dedicated hygiene unit designed to provide efficient hand cleaning before entering controlled or production areas.

Unlike standard wash basins, industrial hand wash stations are built for high-frequency use and are designed to minimize contamination through touch-free or low-contact operation.

Common Components

- Stainless Steel Sink
- Sensor or Manual Tap
- Soap Dispenser
- Hand Dryer (Optional)
- Foot/Knee Operated System
- Waste Drain System

Features of Cronax Hand Wash Station

Premium Stainless Steel Construction
Manufactured using SS304 or SS316 stainless steel for excellent corrosion resistance and long service life.

Touch-Free Operation
Sensor-operated faucets reduce hand contact and improve hygiene.

Ergonomic Design
Designed for comfortable and efficient use in busy industrial environments.

Easy to Clean
Smooth stainless-steel surfaces prevent dirt accumulation and simplify maintenance.

Water Efficient
Optimized water flow helps reduce wastage without compromising cleaning performance.

Customizable Configurations
Available in single, double, and multi-user designs to suit different facility requirements.

Applications

Pharmaceutical Manufacturing
Supports GMP and cleanroom hygiene practices.

Food Processing Industry
Helps prevent contamination during food production.

Hospitals & Healthcare
Improves infection control in clinical environments.

Cleanrooms
Maintains cleanliness before entering controlled areas.

Electronics Manufacturing
Reduces contamination in precision assembly operations.

Laboratories
Supports safe and hygienic laboratory practices.

Cosmetics Industry
Maintains hygiene during production and packaging.

Manufacturing Plants
Improves employee hygiene across industrial facilities.

Why Choose an Industrial Hand Wash Station?

Improved Workplace Hygiene
Encourages proper hand washing and reduces contamination risks.

Better Compliance
Supports GMP, HACCP, ISO, and other hygiene standards.

Increased Employee Safety
Helps reduce the spread of germs among workers.

Long-Term Durability
Heavy-duty stainless steel construction ensures reliable performance.

Reduced Maintenance
Simple design makes cleaning and servicing easier.

Professional Facility Appearance
Enhances the overall cleanliness and image of the workplace.

Available Models

Based on Number of Users

- Single User Station
- Double User Station
- Triple User Station
- Multi-User Station

Operation Options

- Sensor Operated
- Foot Operated
- Knee Operated
- Manual

Installation Options

- Wall Mounted
- Floor Mounted
- Freestanding

Trusted Partner for Industrial Hygiene Solutions

Cronax Industries specializes in manufacturing high-quality hygiene and cleanroom equipment designed for demanding industrial environments.

Why Customers Choose Cronax

- Premium Quality Stainless Steel
- Precision Manufacturing
- Custom Design Options
- Reliable Performance
- Competitive Pricing
- Fast Delivery
- Excellent After-Sales Support
- Industry-Specific Solutions

Typical Installation Areas

Industrial hand wash stations are commonly installed at:

- Factory Entry Points
- Cleanroom Entry
- Pharmaceutical Production Areas
- Food Processing Units
- Hospital Operation Theatres
- Laboratory Entrances
- Packaging Areas
- Quality Control Rooms
- Production Floors

Why Invest in a Quality Hand Wash Station?

A quality hand wash station is more than a hygiene product—it is an investment in workplace safety, product quality, and regulatory compliance.

By installing Cronax **Hand Wash Stations**, organizations can:

- Improve employee hygiene
- Reduce contamination risks
- Protect product quality
- Enhance operational efficiency
- Build a safer and cleaner workplace

Thank you so much

Let's Build Cleaner, Safer Workplaces Together.
